SKILLS & INTEREST

Aspiring to continuously grow in the field of programming, I am a software developer specializing in data structures using Python. I am highly proficient in web development with PHP, CSS, and JavaScript, and have hands-on experience building dynamic web systems using the Laravel framework. I design system interfaces and workflows using Figma, and I am skilled in database design and management with MySQL, including creating well-structured relational databases. I also collaborate effectively within teams using GitHub for version control and project coordination.
